

Name of measuring program:

Makrelen und Stöcker-Eier-Survey (MEGS)

ID of measuring program:

ANSDE_MP_305

Marine waters (seas):

ANS

indicators (2014):

Monitoring programmes (north sea):

- Mobile species (fishes) - abundance and/or biomass

Monitoring programmes (baltic sea):

Temporal scope start:

1970-01-01

Temporal scope end:

Description monitoring period:

Der MEGS findet während der Laichsaison von Markele und Stöcker statt.

Spatial scope:

- Beyond MS Marine Waters

Description spatial scope:

Das Makrelenei-Survey findet am Westrand des europäischen Atlantikschelfs statt.

Purpose:

- Environmental state and impacts

Description of purpose:

Specifications:

- Fish (8)

Responsible institution:

- TI

Involved institution:

Elements monitored:

Parameters measured:

table of method url:

Description sampling method:

Quality Assurance:

- ICES Data Centre Data Type Guides

description quality assurance:

TI-interne Qualitätskontrolle, welche den Anforderungen des ICES entsprechen.

Quality Control:

description quality control:

Spatial resolution (density) of sampling:

0

Description Spatial resolution (density) of sampling:

number of samples per year:

0

addendum number of samples per year:

frequency:

Yearly

Description frequency or rather cycle or count per year:

Wegen der enormen zeitlichen (Januar-August) und räumlichen (Gibraltar bis Färöer) Ausdehnung des Laichgeschäfts erfolgt das MEGS seit den 1970er Jahren nur alle drei Jahre.

periodicity of sampling:

Every 3 years
